

EeStairs Quality Levels - Wooden Steps

We are innovators, and we pursue excellence. Our in-house engineers and materials specialists work closely with designers to refine key structural and aesthetic details, with one aim: to produce stairs that are architecturally superb. Crucially, we control the entire stair-making and installation process to ensure that our stairs meet the highest international quality and safety standards.

Below we describe three grades of wooden step. At EeStairs the standard is **AA** unless specifically stated:

Grade	A (1 piece)	AA (2 piece - Our Standard)	AAA (Masterpiece)
Description	Steps are a single solid piece of wood meaning there is the possibility that, in certain uses, the steps may bend, crack or discolour to a degree.	These steps, made with two layers of hardwood -core MPX®, will improve the quality and construction of the steps, and prevent cracking.	These engineered laminated wood steps bring out the natural beauty of wooden staircases, and make the steps an eye-catching part of the design.
Massive Wood Look	✓	✓	✓
Invisible Structure	✗	✓	✓
MPX®	✗	✓	✓
